

# GREENHOUSE SHRUBS, VINES, HERBACEOUS PLANTS AND BULBOUS ROOTS,

CULTIVATED AND FOR SALE AT THE

LINNÆAN BOTANIC GARDEN,

*Flushing, near New-York,*

**William Prince & Sons, Proprietors.**

It will be perceived that numerous and splendid acquisitions have been made to the Greenhouse department, and great perspicuity and attention have been exercised in selecting the most interesting and beautiful. In accomplishing this, the leading object of the Proprietors has always been rather to enrich and aggrandize his establishment, than to be guided by mere pecuniary considerations; very many of the plants having been purchased at an expense of from four to five guineas each. In rare and valuable productions from every quarter of the world, and especially from China and Japan, this collection is particularly rich and interesting.

The prices have been greatly reduced, and are as low or lower than the same articles *equally genuine, and of equal quality*, can be obtained far elsewhere.

Many species of plants arranged in other catalogues as Greenhouse Plants, having been found by experience sufficiently hardy to support our winters, are omitted in this Catalogue, but will be found under their respective heads in the Catalogue of Hardy Trees, Shrubs, &c. from pages 45 to 88 inclusive.

Those checked thus \* though generally cultivated as greenhouse plants, will when well grown, stand the winters of the middle States in the open air, and a large proportion of the others will support the winters of the Southern States.

Nearly all the following will thrive in a comfortable sitting room during the winter—they are in pots or boxes, and the prices are inclusive.

	Each \$ cts.
1 JAMAICA liquorice	75
2 Prickly leaved acacia	75
3 White flowered do	1
4 Glandulous American do	1
5 Decurrent do	1 50

### CAMELLIA JAPONICA, OR JAPAN ROSE.

At the following very reduced prices.

The following collection of Camellias comprises the newest varieties, the most of which are very remarkable for their splendor. Many of those

priced at the highest rates, cost the proprietors *five guineas each* for the original plants; and many others from three to four guineas. The prices are now greatly reduced, in consequence of the plants being much increased; but, owing to the universal admiration which this plant has received, and its requiring so little care, and enduring without injury a great degree of cold the demand has hitherto been very great. The proprietors have at all times very large quantities to supply wholesale orders; and their present collection exceeds 3000 plants, which they are rapidly increasing. The prices have necessarily to be in proportion to the age and size of the plants and are lower than ever before offered.

- 1 Single red camellia, or *Japan Rose Camellia japonica* 75 cts. to \$1  
Ditto, *larger size*, \$1,50

The following varieties, will be furnished at the annexed rates proportioned to their age, or the period they have been ingrafted or inarched.

		1 year ingrat- ed.	2 year ingrat- ed.	3 and 4 years ingrafted
2 Single white fragrant	<i>Camelia alba simplex</i>	2	2 50	\$3 to 3 50 according to size
3 Semidouble, rose colored	<i>capansa</i>	2	3	
4 Double red	<i>rubra plena</i>	1 50	2	
5 Double white	<i>alba plena</i>	1 50	2

94 Beauty of Vauxhall	concinna	10 to 12
95 Young's semidouble red	epsomensis	8
96 Variable white	variabilis	10 to 12
97 Yellowish white	luteo alba	10 to 15
98 Blush flowered	blanda	8 to 12

N. B. Various other varieties are in a course of propagation and amateurs will be furnished with lists of the new acquisitions whenever desired. There will also be an annual diminution in the prices of the most expensive varieties, arising from the increase by propagation, &c. and corresponding lists, *with these reductions* will be furnished between the periods of publication of the large catalogue to all who apply therefor. Extra large plants can be supplied of many of the kinds of Camellias, the charge for these will be in proportion, but in all cases as reasonable as they can be afforded,

### CHINA ROSES.

Most of which are monthly, or ever-blooming.

\*These are cultivated in pots, and can therefore be sent at any season of the year they are desired.

The monthly varieties, when planted in the open ground, are particularly interesting, on account of expanding their flowers in March and April, when those of other kinds have not yet made their appearance.— They continue to bloom throughout the summer; and in the autumnal months their numerous flowers also afford particular gratification, as nature then seems most to need their cheering influence. Nearly the whole number support our winters with little or no protection, as designated by this mark †; those most tender need only to have a box or barrel placed over them during winter. Where any kinds are designated as climbers, it is meant that they grow tall, and are suitable for training, &c.

530 †Single China rose	Rosa indica	\$0 40

## ORANGES, LEMONS, CITRONS, SHADDOCKS, AND LIMES.

These require sufficient protection in winter to keep them from freezing in the states north of South Carolina: in the latter state and those south of it, they do not require it. In Italy, extensive nurseries of these fruits are cultivated, some of which contain 200 varieties. A work has recently been published at Paris, edited by Messrs. Risso and Poiteau, which contains engravings and descriptions of 160 varieties, comprising the most valuable and interesting. It is from an inspection of those figured in this work that the new varieties have been selected which are here enumerated; to obtain which has been attended with great difficulties. About 40 new varieties, not here enumerated, will be ready for sale in September next, when an extra catalogue of them will be furnished.

Those marked thus\*, if of 1 year's growth from inoculation, \$2  
 2 do do do 3  
 3 do do do 3 50

Those marked thus † are \$3 50 each. Some of these kinds are of three, and others but of one and two years growth.

Those marked thus † will be each \$5, and being quite new, are not at present large.

## ORANGES.

47 †Sweet fruited do	<i>dulcis</i>
48 *Bergamot lemon	<i>bergamia</i>
49 †Bergamot perette of St. Domingo	<i>perette</i>
50 ‡Trifoliolate leaved lime	<i>trifoliata</i>

**NEW ORANGES.**

52 †Gros royal	76 †Mandarina
67 †Pompoleon	79 †White fruited Portugal
69 †Large red Portugal	80 †Gold variegated leaved biga-
70 †Waved leaved, or undulated, <i>large foliage</i>	<i>rade, very curious</i>
74 Multiflora	94 †Calingula bigarade

**NEW LIMONS.**

51 †Round fruited	55 †Chestnut leaved
53 †Long leaved, or <i>longifolia</i>	89 †Jarette
54 †Cluster fruited	90 †Poire du Commandeur

**POMEGRANATES. Grenadier.**

Those marked thus \* are 75 cents; thus † \$1; and thus ‡ \$1 50.

The fruit requires in this latitude, that the trees should during winter be placed in a cellar, or some other place free from frost. South of the Potomac, it is supposed they will not require that care.

1 *Fruit bearing	<i>Punica granatum</i>
2 †Large Malta	<i>me'itensis</i>
3 ‡Sweet fruited	<i>dulcis</i>
4 †Acid fruited	<i>acida</i>
5 ‡Semi-acid	<i>mi-acida</i>
6 *Double crimson	<i>rubra plena</i>

7 †Great Double crimson	<i>Punica plena major</i>
8 †Prolific	<i>prolifera</i>
9 †White flowered and fruited	<i>alba</i>
10 †Double white flowering	<i>alba plena</i>
11 †Yellow flowering	<i>flava</i>
12 *Dwarf profuse flowering	<i>nana</i>
13 †Chinese	<i>chinensis</i>

---

### OLIVES. *Oliviers.*

Those marked thus \* are \$1; thus † \$1,50; and thus ‡ \$2.

These species require in this latitude, during winter, that the trees be placed in a cellar, or some other situation free from frost. It is considered that south of Virginia this care will not be requisite.

1 †European	<i>Olea europea</i>
2 ‡Blanquet	<i>var.</i>
3 ‡Bouquetier	<i>var.</i>
4 ‡Negron	<i>var.</i>
5 †Large Boutignan	<i>var.</i>
6 †Large redouac	<i>var.</i>
7 †Le pas à bouquet	<i>var.</i>
8 †Common, or <i>ordinaire</i>	<i>var.</i>
9 †Large fruited, à <i>gros fruit</i>	<i>var.</i>
10 †Eatable, or <i>Bonne à manger</i>	<i>var.</i>
11 †Vermillon	<i>var.</i>
12 †Grossane	<i>var.</i>
13 †Long leaved	<i>longifolia</i>
14 †Broad leaved	<i>latifolia</i>
15 *Box leaved	<i>buxifolia</i>
16 †Twisted leaved	<i>obliqua</i>
17 †Warted cape	<i>verrucosa</i>
18 Wave leaved cape, ‡3	<i>undulata</i>
19 Cape-of-Good-Hope broad leaved	<i>capensis</i>
20 Madeira, ‡3	<i>excelsa</i>
21 Chinese fragrant, <i>exquisitely sweet</i> , 1 to 2 dollars	<i>fragrans</i>
22 Smooth leaved	<i>laevis</i>
23 American, 75 cents Ditto, <i>larger size</i> , ‡1	<i>americana</i>
24 *Narrow leaved	<i>angustifolia</i>
25 Asiatic, ‡3	<i>asiatica</i>
26 Mauritius lance leaved, ‡2	<i>lancea</i>
27 *Twiggy, or branching	<i>media</i>
28 †Gold blotched leaved	<i>fol. var.</i>
29 †Rosemary leaved	<i>rosmarinifolia</i>
30 *Holly leaved	<i>spinosa, vel. illicifolia</i>
31 †Chinese red	<i>fragrans, rubra</i>
32 †Small leaved European	<i>parvifolia</i>

---

### DOUBLE DAHLIA, OR GEORGINA.

This magnificent plant bids fair to rival in splendor and in variety the far famed Tulip and the Rose. Many of the varieties are inconceivably beautiful and interesting, and there seems a never ending diversity both

of color and form. It combines the richest shades and most varied hues of which nature is susceptible, with every diversity in shape and magnitude, from the size of a small globe an inch and a half in diameter, to an expanded bloom twenty inches in circumference. Most persons are not aware how simple are the means requisite to their preservation in winter. When the frost has destroyed the foliage, nothing more is necessary than to cut off the stalks two to three inches from the ground, and to take up the roots and put them in boxes of dry sand in a cellar, or any other place free from frost, there to remain till spring without further care.

The collection here offered is unrivalled in extent and beauty, and combines the most magnificent varieties of each class; it being a concentration of the most choice and interesting that could be selected from the five largest establishments of Europe. Other new varieties are continually accumulating, and Supplementary Catalogues containing the additional varieties will be published in March and October of each year.

The letters annexed to the different varieties designate the height to which they usually attain: Thus, A denotes those that do not exceed two feet—B those which attain to between two and three feet—C, three to four feet—D, four to five feet—E, five to six feet—F, six to seven feet—G, over seven feet. The notes attached to the respective varieties, descriptive of their qualities, &c. are the result of the personal examination of the Proprietors, made during the present season.

A discount will be made to those who purchase largely and to Nurseries and other venders. To those who order a dozen plants or more, an abatement of 25 per cent will be made from the stated prices which it will be perceived are much lower than usually charged, the great and increasing stock enabling us to offer them on these favorable terms, and also to select superior roots.

## REMARKS.

THE Trees, Shrubs and Plants, contained in the annexed Catalogue, can be packed in such manner as to be transported at any season of the year; and all orders from a distance receive the same pointed attention as if the persons desiring them were present to make their selections; information will also be freely imparted with regard to the best means of culture &c.; and the packages will be shipped to any port designated. Remittances can be made by draft on any city from Portland to New-Orleans. In the transmission of plants to foreign countries, and to the various ports of the Union, New-York possesses decided advantages, regular packets being established with a great number of places, both at home and abroad, and the general facilities of intercourse being so enlarged and increasing.

In offering to the public this Catalogue, the Proprietors cannot refrain from calling the attention of amateurs to the numerous highly interesting trees and plants which it contains, and many of which are found in no other collection in our country. These have, in many instances, been attended with such expenses in their importation, that had a desire for profit *alone* animated the Proprietors, they would not have been so ardent in obtaining them: but desirous that our country should at least hold that rank in her botanic collections which she does in every other respect, and influenced by that zeal which ever inspires the votaries of Flora, they have incurred disbursements to an amount never hazarded by any other establishment in the Union. The prices of the plants newly imported

are regulated by their absolute *cost*, and will be lessened as their culture may be attended with more or less success; many of those of less recent introduction are now placed at prices much reduced. An establishment so extensive as this, cannot of course be conducted without immense disbursements, in making which the Proprietors have greatly to rely upon the patronage they may receive in the sale of its productions. It is their desire to introduce every Tree, Shrub, or Plant, which may be useful in the various departments of national industry, as well as those which serve to gratify our pleasures alone: and it remains now to be tested, whether the success which shall attend the very extensive importations already made, will warrant their continuance on the same expensive scale. Comprising, as this garden does, an extent of more than 40 acres, *compactly filled*; with the very extensive range of Green-Houses, which contain above 20,000 plants in pots; and being surpassed or equalled by few even of those which have received in foreign countries the patronage of royalty, the Proprietors' most anxious desire has been to give to their establishment the character of a *National Institution*; and animated by those feelings, which all seem concentrated in the "*pride of country*," they rely on that country to aid in its advancement.

As many persons in the Union act as agents for different nursery establishments, it is particularly requested, that where orders are intended for us, it be plainly specified; and every invoice we transmit will have a *printed heading, and our signature, to prove it genuine*. We mention these cautions *for good and conclusive reasons, and we particularly enjoin its observance on purchasers, as we know we have been injured by deceptions*.

Orders from a distance can be transmitted through an agent or *direct* by mail or otherwise, and the various demands will be executed with that accuracy and despatch which characterize the general transactions of the establishment.

The following distinct catalogues and publications relative to the different departments of the establishment may be obtained of the different agents, or by direct application to the proprietors, the four first mentioned being distributed *gratis* :—

- No. 1. Fruit and Hardy Ornamental Trees, Shrubs, and Plants, pp.
- No. 2. Bulbous and Tuberos Rooted Plants, pp. 24.
- No. 3. Green-house Trees, Shrubs, and Plants, pp. 48
- No. 4. American Indigenous Trees, Shrubs, and Plants, pp. 52.
- No. 5. A catalogue of Garden and Flower Seeds, &c.

These catalogues can be transmitted by mail, at a postage of 1½ to 2½ cents per sheet, as well as the books below named.
